Launches in JANUARY 2021

Science and Technology of Advanced Materials (STAM), an international materials science journal sponsored by the National Institute for Materials Science (NIMS) and the Swiss Federal Laboratories for Materials Science and Technology (Empa), is pleased to announce the launch of its sister journal, STAM Methods (STAM-M).

We are waiting for your submissions!

Details are on reverse side.

STAM–M is the first open access and peer reviewed sister journal of Science and Technology of Advanced Materials (STAM) publishing high-quality original research. STAM–M focuses on novel and innovative methods to improve and accelerate the development of materials, including methodology, informatics, databases, instrumentation, and programming. Notably, novelty of materials is not a prerequisite to demonstrate the importance and significance of new methods described in papers published in STAM–M.

All articles in this journal will undergo rigorous peer review based on initial editorial screening and recommendation reports by at least two referees.

Please note that STAM–M only publishes manuscripts in English.

STAM–M accepts the following types of articles: primary research papers, review papers, case studies, and rapid communications (letters).

Each article is published under the CC-BY license, with the copyright remaining with authors.
PREPARING YOUR PAPER

Submitted manuscripts should follow the following structure, 1 to 6.

1. Title/Author names/Affiliations/Keywords
   - The corresponding author(s) should be identified.
   - Keywords: Maximum of 10

2. Graphical abstract (Optional)
   - This is an image to give readers a clear idea of the content of the article.

3. Classifications
   - Materials data generation (High throughput instrumentation, experiments and/or calculation)
   - Materials data analysis (AI, machine learning, data-driven analysis, descriptor development, structure search and/or identification)
   - Materials data utilization (data mining, high throughput screening)
   - Computer systems and services
   - Databases, data structure, ontology

4. Chapters/Conclusions/Acknowledgements
   - The abstract should be less than 250 words.

5. References
   - References should be identified by bracketed numbers consecutively in the order in which they are first stated in the text, and consist of a list of reference numbers at the end of the article with the same style as that of Science and Technology of Advanced Materials (STAM).
   - Details here: Online ISSN: 1878-5514, https://www.tandfonline.com/stam

6. Figures and captions, Tables and captions

SUBMITTING YOUR PAPER

This journal uses ScholarOne Manuscripts to manage the peer-review process. If you haven’t submitted a paper to this journal before, you will need to create an account in the submission centre. Please read the guidelines above and then submit your paper in the relevant author centre where you will find user guides and a helpdesk.
